Docita

The Bridge from Paper to Cloud

A connected clinic management OS for Indian private clinics and hospitals. Run appointments, records, prescriptions, billing, and WhatsApp from one workspace.

docita.work | app.docita.work | LinkedIn | Instagram | X

The Problem

Indian clinics lose time, patients, and revenue because nothing is connected.

Paper & Excel

Patient records in notebooks. Billing in Excel. Nothing talks to anything.

Doctor Admin Burden

Doctors spend more time on paperwork than on patients. Prescriptions handwritten.

Tool Juggling

One app for booking. Another for billing. WhatsApp for everything else.

Zero Visibility

Owners don't know who's waiting, what was billed, or which follow-ups are missed.

The Solution: One Connected Workspace

Every action links to the next. Nothing falls through the cracks.

LIVE NOW (13 FEATURES)

- **Scheduling** — Calendar, online booking, reminders
- **EMR** — History, vitals, SOAP notes, digital Rx
- **Billing** — Invoices, UPI/card, insurance, daybook
