Docita

Modern Clinic Management OS — The Bridge from Paper to Cloud

30-Day Free Trial • No Credit Card

THE PROBLEM

- Paper registers, Excel, WhatsApp — nothing connected
- Doctors waste time on admin instead of patients
- Front desk juggles multiple tools for every task
- Owners have zero visibility into daily operations

THE SOLUTION

- One workspace: appointments, records, consults, billing, follow-ups
- Every action links to the next — nothing falls through cracks
- Start with one doctor, one front desk user. Scale when ready.
- Built for Indian private clinics & hospitals

WHO IT'S FOR

AUDIENCE	WHAT THEY GET
Solo Doctor	Patient context instantly, Rx in seconds
Front Desk	One screen: queue, booking, payment
Clinic Owner	Daily visibility — waiting, billed, pending
Hospital Admin	Dept coordination: desk, doctors, lab, beds

PRICING TIERS

Starter	Essential	Professional	Hospital	Enterprise
Solo	Multi-doc	Clinic	Multi-dept	Chain

Full or Front Desk mode — 70% pricing for ops-only clinics

WHY DOCITA

- **Connected, not siloed** — book, consult, prescribe, bill, follow-up all link to one record
- **India-first** — UPI, WhatsApp, DPDP built in; ABDM/ABHA on roadmap
- **Start small** — one doctor + front desk on day one; scale when ready
- **Migration path** — Excel import and OCR from paper, no history lost
- **Secure by default** — RBAC, tenant isolation, audit logging, PHI protection

ARCHITECTURE

```
Frontend (Cloudflare Workers)              Backend (Fly.io, Mumbai)
Clinician App (Next.js)  ──►  API (NestJS)          Database: PostgreSQL (AWS RDS)
Admin Portal (Next.js)        Worker (jobs/crons)    Storage:  Cloudflare R2
Marketing   (Astro)           Turborepo + pnpm       Zod-first type system
```

Run your clinic from one place.
